

“I Was Scheduled for Surgery in Two Weeks but I Saw the Light”

How Laser Therapy Helped Me Reclaim My Life

I always thought that the only solution for Carpal Tunnel Syndrome was surgery. I was suffering from pain, weakness and both of my hands were numb for several months! The pain was so severe that I had difficulty with everyday activities from my home life and work. As a blackjack dealer at one of our local casinos, it is not uncommon for me to deal hundreds of cards each night. The repeated twisting movement became so painful that I would often drop chips and cards during my shifts. To make things worse, I also work as a carpenter during the day. I could barely hold the cutting tools, let alone twist and squeeze the necessary tools to re-side a home! The pain finally became so intense and constant that it was affecting me at all hours of the day and night. A good night's rest was virtually impossible! The pain, numbness, and weakness got to a point where I couldn't take it any more and I made an appointment with a local orthopedic surgeon. He diagnosed me with Carpal Tunnel Syndrome. He recommended that I have wrist surgery to correct the problem, and I was scheduled to have it as soon as possible.

Fortunately, before I had to go under the knife, I noticed Dr. Mooradian's Advertisement about a non-surgical treatment for Carpal Tunnel Syndrome, which used the FDA approved Cold Laser Therapy. I made an appointment with Dr. Mooradian at his New London office immediately. After taking a thorough history and examination he agreed that I had a severe case of bilateral Carpal Tunnel Syndrome.

However, based on prior cases Dr. Mooradian thought I would be a good candidate for Cold Laser Therapy. I was able to arrange an early morning appointment, which wouldn't conflict with either of my jobs, and I started therapy right away. The therapy worked so well I cancelled my surgery! Not only did my pain go away but the numbness was gone and the strength was back in my hands! I was finally able to get a good night's sleep and reclaim my life!

Gary's success in treating his pain through cold laser therapy and chiropractic care can be yours. At Eastern Shore Chiropractic, Dr. Christopher Mooradian and Dr. Mary Lavin have had tremendous success using cold laser therapy.

If you are suffering from throbbing pain, numbness and weakness into your hands, you may have Carpal Tunnel Syndrome. FDA approved Cold Laser Therapy may be the answer you're looking for!

P.S. Call Eastern Shore Chiropractic today for a free initial consultation to see if you are a candidate for Cold Laser Therapy. What are you waiting for?
